Subject: Activities from January  
Your letter attribute: -  
Our letter attribute: 680/omgeving11  
Project: First Rotterdam

7 January 2015

Dear Sir/Madam,

Through this letter we would like to inform you about the coming activities for the next period.

FIRST Rotterdam will be built in two follow-up phases; the High-Rise building (128m high) and the Low-Rise building (35 m high) at the side of the Diergaardesingel. For the most part the construction will be built up by using precast facade elements, wall elements and floor elements. Because of this building method we are able to construct faster and start earlier with the finishing works. This results in less inconvenience for the residents. At this moment we are constructing the 5<sup>th</sup> floor. We expect to finish the construction of the high-rise and the low-rise building around the summer.

At the 15<sup>th</sup> of January the "Wall Reliëf no. 1", designed by world famous English sculptor Henry Moore, will be moved to its new position. The wall relief will be incorporated with the new structure of the low-rise building. With this integration the wall-relief will get its new function as a part of the facade. The 180-ton wall relief will be moved by special transport vehicles from its storage place to the new destination at the Weena-side. The entire movement takes place within the construction site. When the movement is done, the wall-relief will be put into the right position and will be attached to the new basement construction as well. Earlier in 2012 the Wall relief was taken out of the former "Bouwcentrum" building and was moved to its current storage position.

We hope to have informed you sufficiently. Like previous writings, this letter is also published on the website [www.bc-first.nl](http://www.bc-first.nl). On this website the current state of affairs and progress will be updated regularly.

With kind regards,

**Bouwcombinatie FIRST vof**
